

TOXICOLOGY

DRUG SCREENING + CONFIRMATION

Navigate the complexities of medication management with our Precision Drug Monitoring and Confirmation services. Our comprehensive approach begins with sensitive screening tests to detect a broad spectrum of controlled substances and prescription medication. Following any positive screen, we employ gold-standard confirmation testing to provide unequivocal evidence of the drug's presence.

Our confirmation tests quantify specific drugs and their metabolites with precision, distinguishing similar substances and eliminating false positives. This two-tiered process ensures accuracy and reliability, supporting clinicians and organizations in making informed decisions based on definitive analytical data.

SAMPLE TYPE : Urine, Saliva

Results within
48-72 Hours
from arrival at lab

(For Provider's Reference)

SUBSTANCES IDENTIFIED AND CONFIRMED

Our laboratory provides in-depth analytical data, offering both qualitative screening and quantitative confirmation. This meticulous approach ensures accurate identification and measurement of prescribed medications, drugs of abuse, and their metabolites, facilitating precise monitoring and compliance assessments.

Alkaloids

- Cotinine
- Mitragninine

Antidepressants (unspecified)

- Venlafaxine
- Trazodone
- Bupropion

Buprenorphine

- Buprenorphine
- Norbuprenorphine

Heroin

- 6-Monoacetylmorphine

Skeletal Muscle Relaxants

- Carisoprodol
- Meprobamate
- Cyclobenzaprine

Amphetamines

- Amphetamine
- Methamphetamine
- Phentermine

Antiepileptics

- Lamotrigine

Opiates

- Codeine
- Hydrocodone
- Norhydrocodone
- Hydromorphone
- Morphine
- Dihydrocodeine

Methylphenidate

- Ritalinic Acid
- Methylphenidate

Antidepressants

- Citalopram
- Duloxetine
- Fluoxetine
- Sertraline

Natural Cannabinoids

- Delta 9-Carboxy THC

Synthetic cannabinoids

- JWH-18 PA
- JWH-73 BA

Cocaine

- Benzoyllecgonine

Antipsychotics

- Anipiprazole
- Quetiapine
- Risperidone

Fentanyl

- Norfentanyl
- Fentanyl

Benzodiazepines

- Alprazolam
- Oxazepam
- Temazepam
- α -Hydroxyalprazolam
- 7-Aminoclonazepam
- Clonazepam
- Diazepam
- Lorazepam

Oxycodone

- Oxymorphone
- Noroxycodone

Methadone

- Methadone
- EDDP

Ticyclic Antidepressants

- Mirtazapine
- Amitriptyline
- Nortriptyline
- Imipramine
- Desmethyl Doxepin
- Doxepin

Opioids & Opiate Analogs

- Naltrexone
- Meperidine
- Naloxone
- Normeperidine

Other Classes

- PCP
- Ketamine
- MDMA
- Propoxyphene
- Zolpidem
- Gabapentin
- Tapentadol
- Tramadol
- ODM-Tramadol
